(54) Title: CEMENT FLOW CONTROL TOOL

(57) Abstract: An apparatus (10) for controlling the flow of fluid into a borehole through a conduit (60) is described. The apparatus has a decelerating means (30) adapted to be positioned within the conduit. The fluid could typically comprise drilling mud and/or cement, and in some embodiments, some of the cement can exit through apertures (84) in a shroud (82) of the apparatus to cement the decelerating means inside the conduit.
